Nandyka Yogamaya

Dear friends, did you know that the moon once split in half? A long time ago, during the time of Prophet Muhammad (peace be upon him), the moon actually broke into two pieces! This was one of the amazing signs from Allah to show that the Prophet was telling the truth.
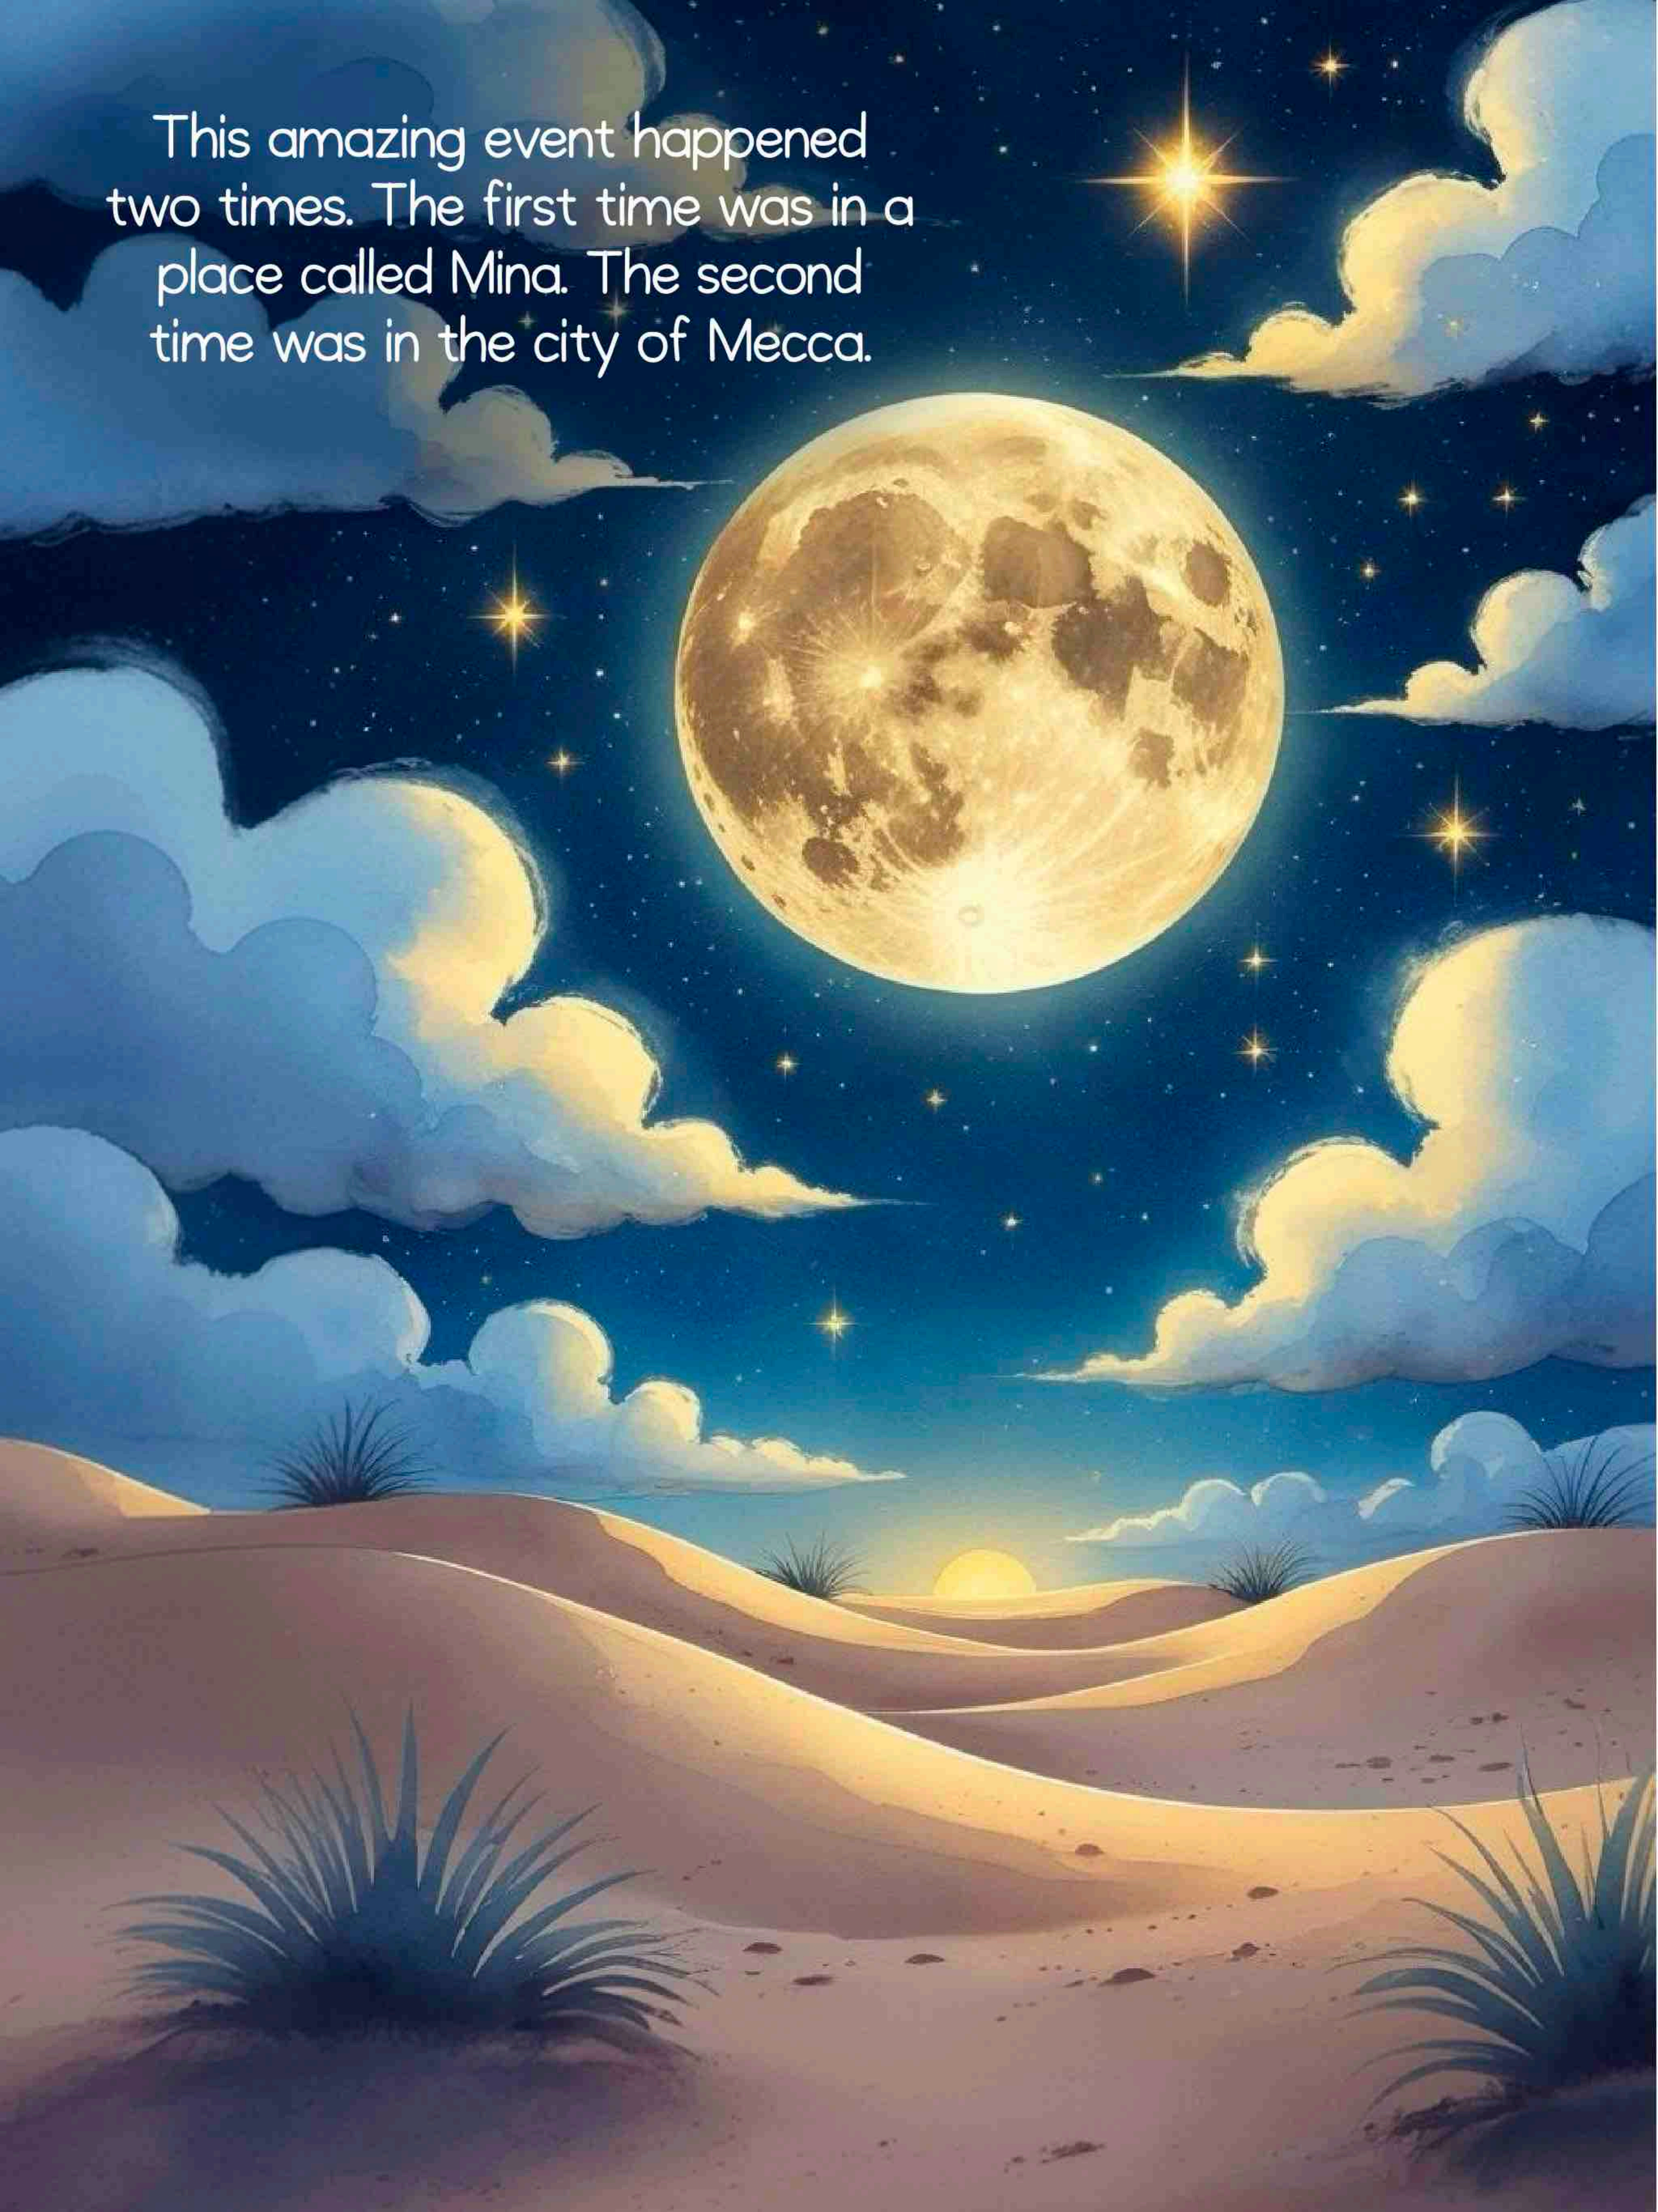

One day, the Quraysh asked the Prophet Muhammad (peace be upon him) to show them something amazing. So, the Prophet pointed up at the moon. With Allah's permission, the moon split into two parts right before their eyes!
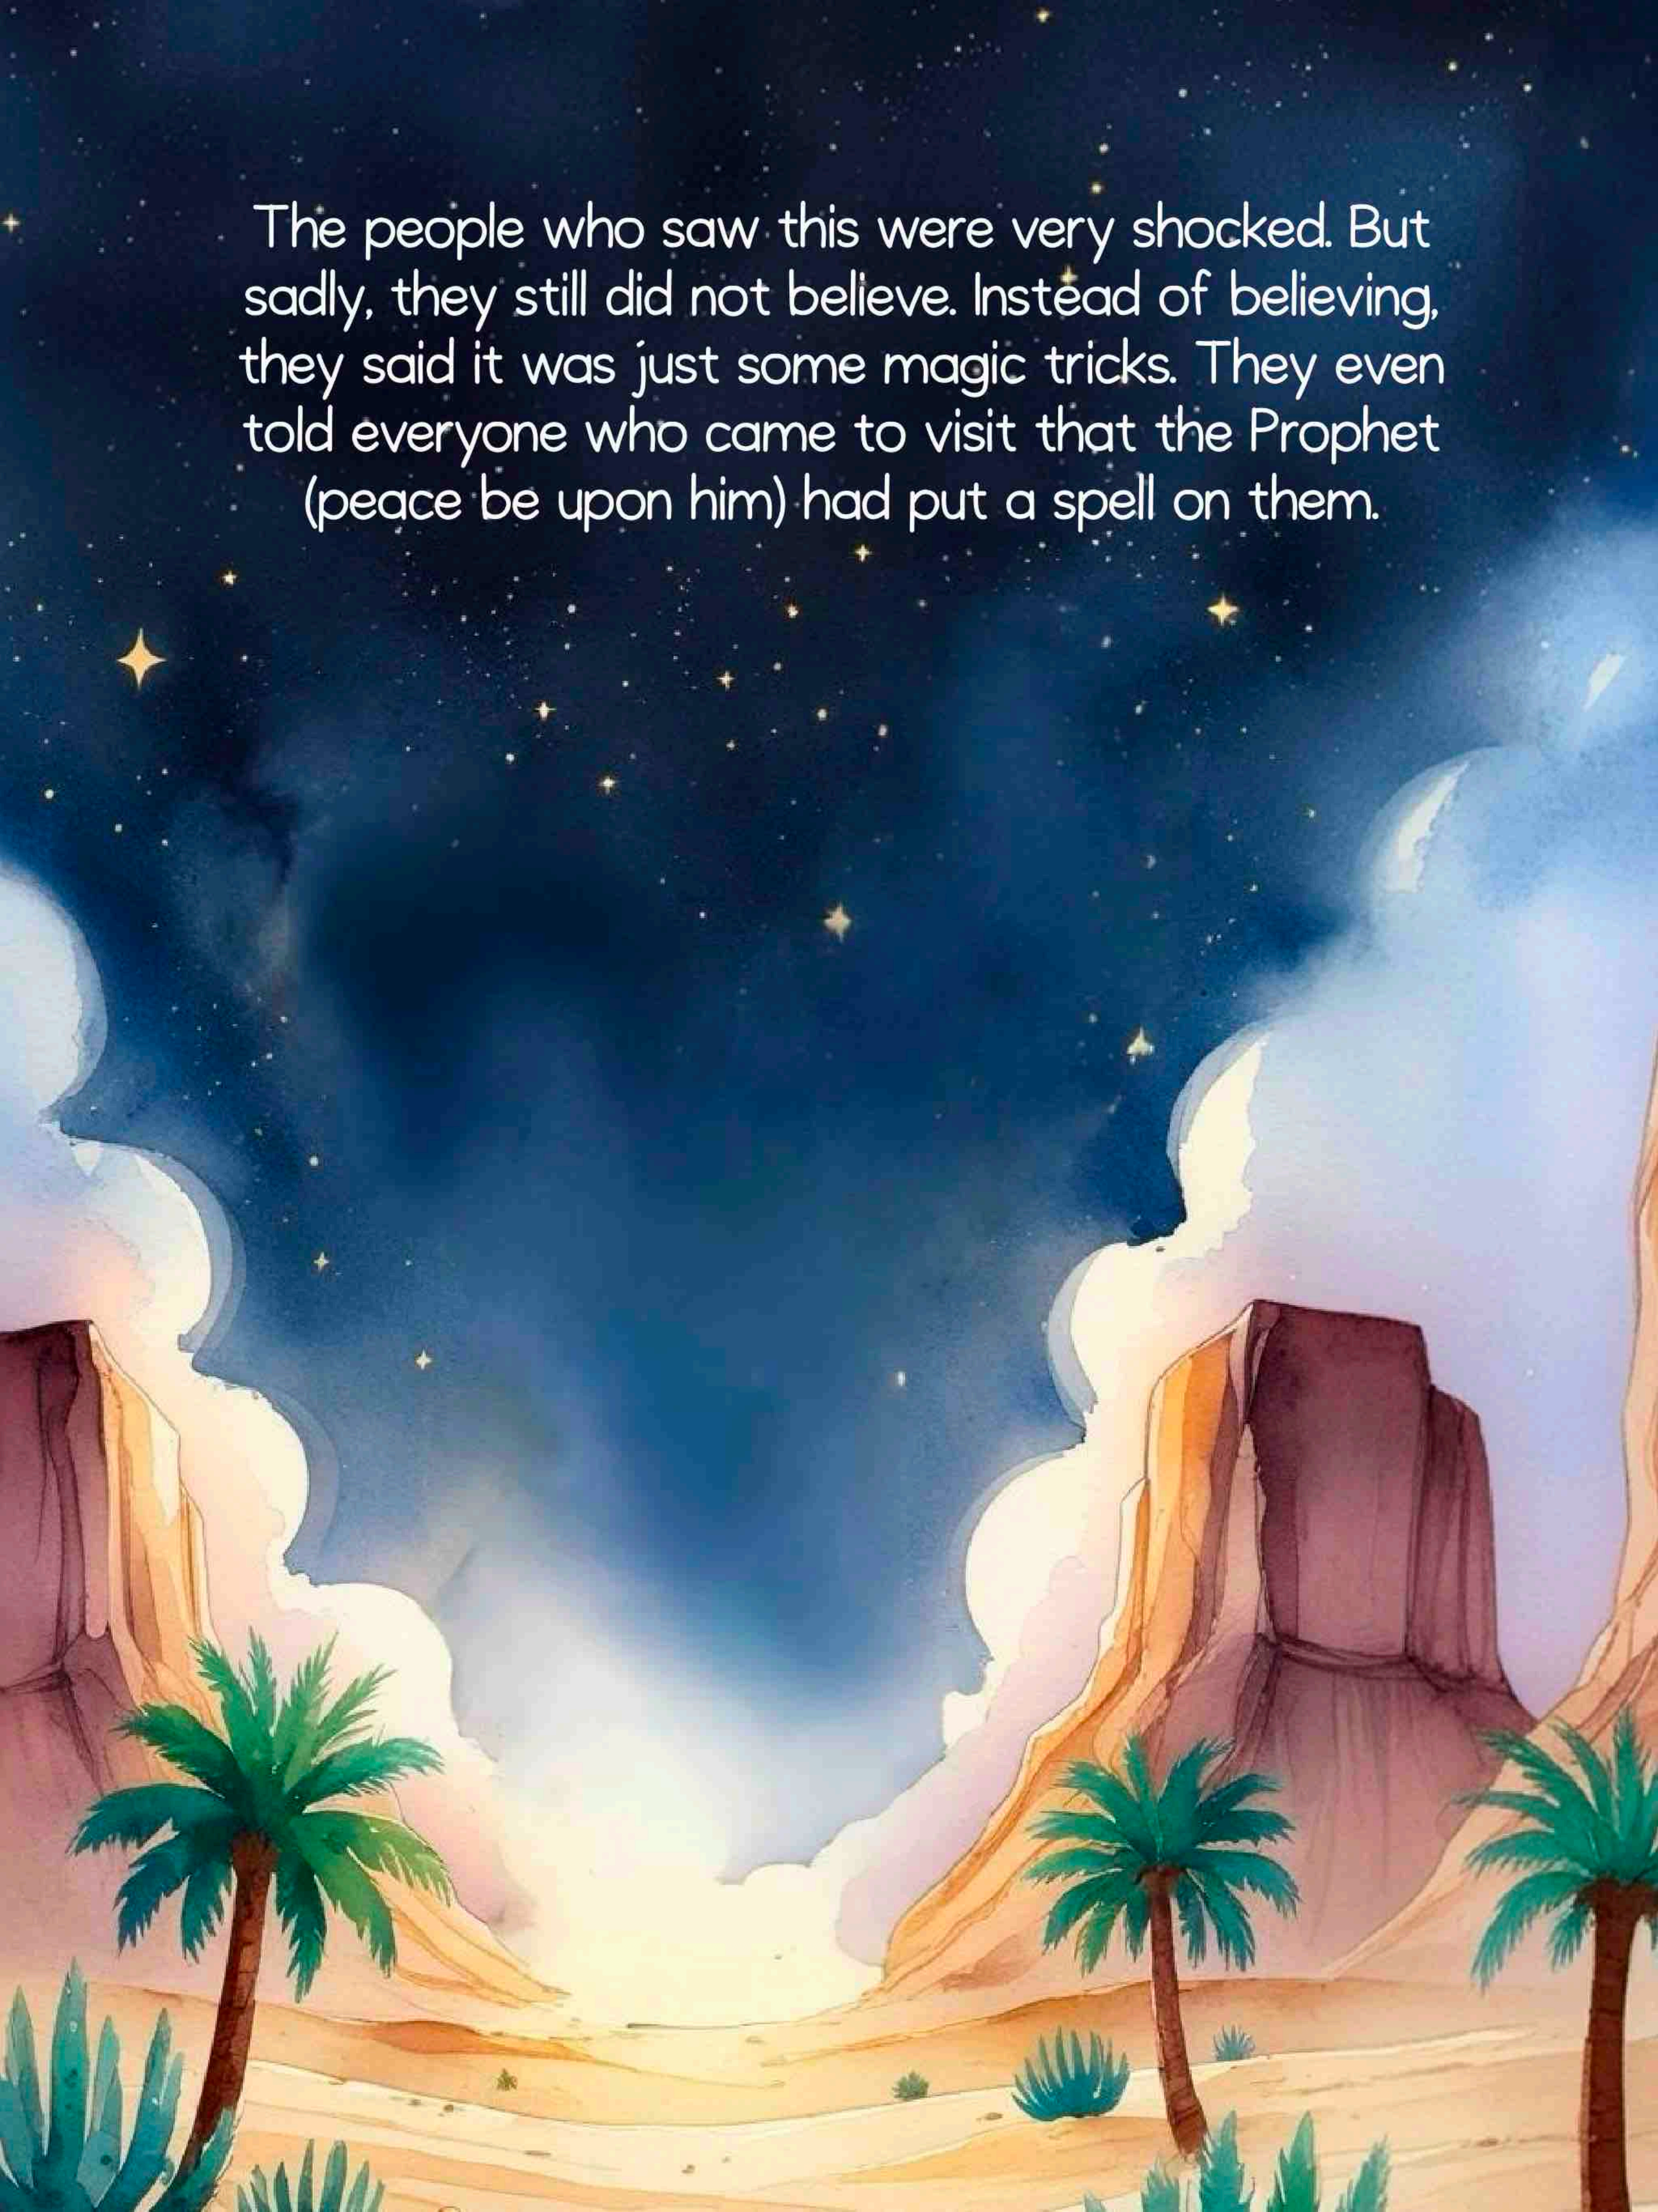

This amazing event happened
two times. The first time was in a
place called Mina. The second
time was in the city of Mecca.

The people who saw this were very shocked. But sadly, they still did not believe. Instead of believing, they said it was just some magic tricks. They even told everyone who came to visit that the Prophet (peace be upon him) had put a spell on them.
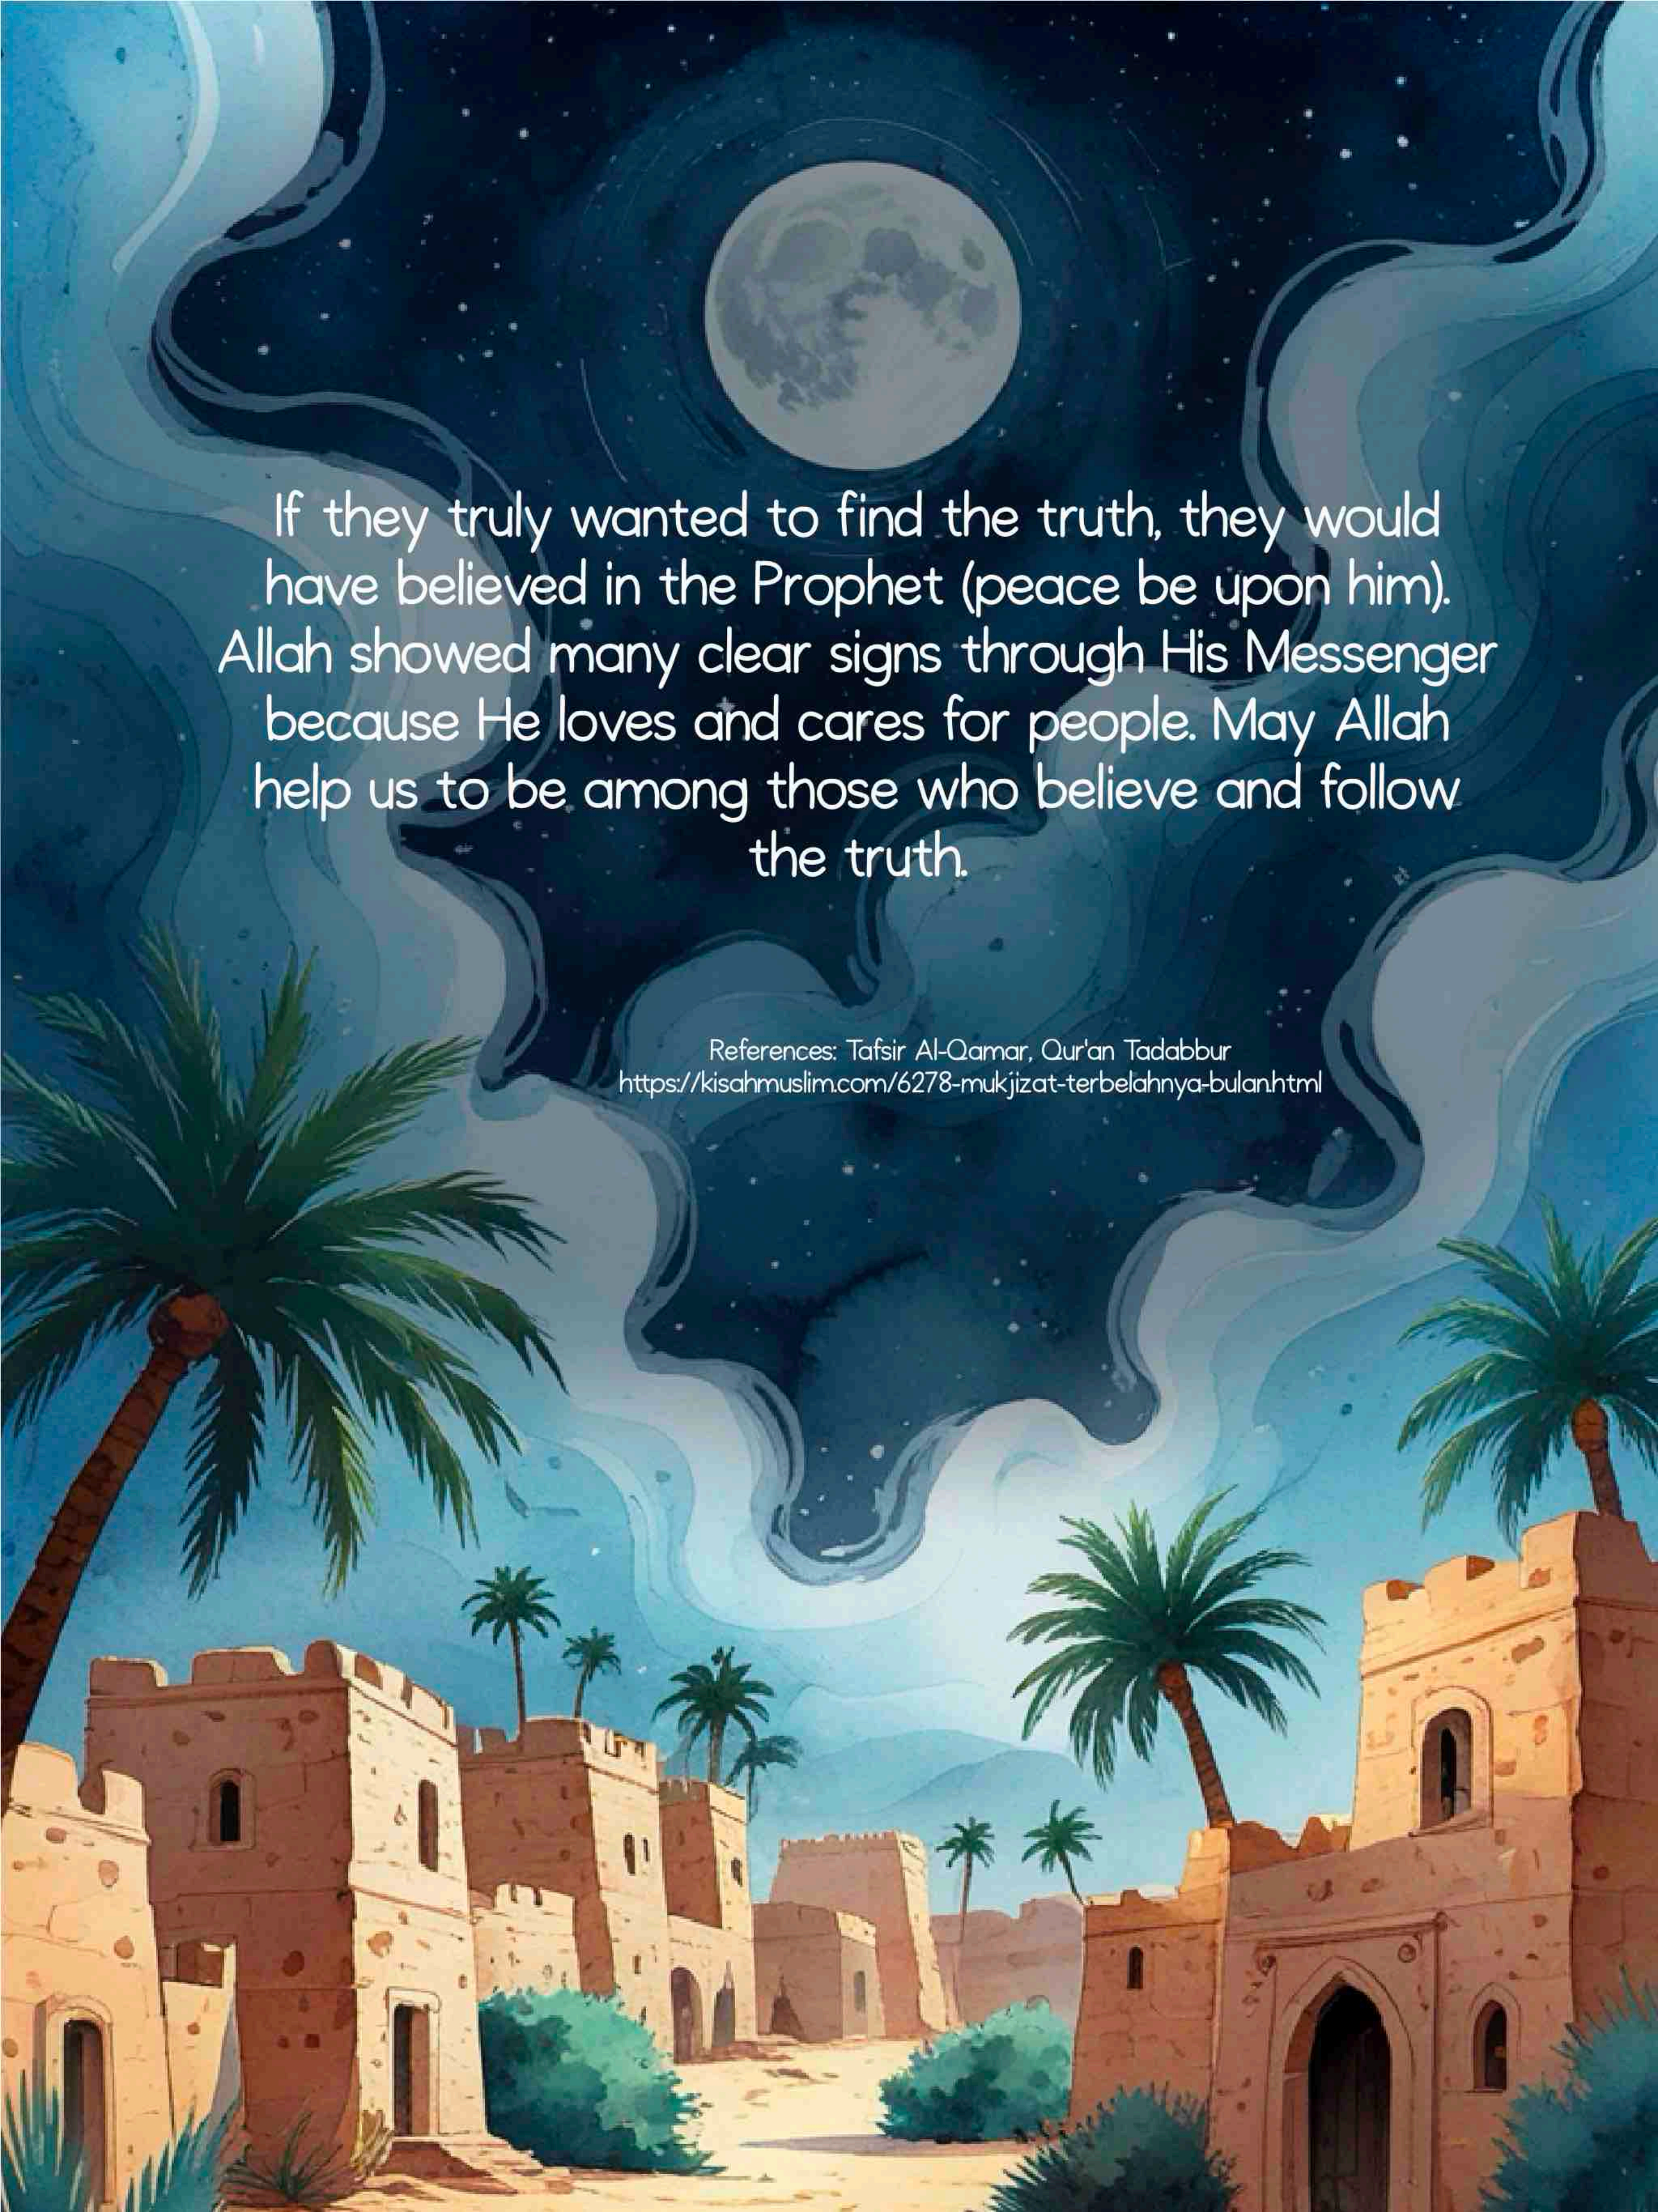

This was not the only time they refused to believe in Allah's signs. Every time Allah showed them proof, they always said it was not real. Deep down in their hearts, they were not really looking for the truth. They just wanted to do whatever they felt like doing.

If they truly wanted to find the truth, they would have believed in the Prophet (peace be upon him). Allah showed many clear signs through His Messenger because He loves and cares for people. May Allah help us to be among those who believe and follow the truth.
